

Motor Vehicle Record Verifications

BACKGROUND

Motor Vehicle Records (MVR) are an important piece of the background screening process for many industries, especially for those regulated by the Department of Transportation (DOT), as they are required to request a new copy of each driver's MVR every 12 months.

Evident's MVR verification solution provides the most up-to-date information on license status, class, moving violations, driving history, and restrictions. With connections to **more than 6,500 authoritative sources through a single API**, Evident is the only solution that enables secure and comprehensive verifications without the risk and liability of holding personal information.

Evident's comprehensive platform makes it easy for organizations to verify MVRs in tandem with background checks, identity verification, or personal/commercial auto insurance coverage verification. Combining MVR verifications with identity proofing is particularly helpful for companies that hire contracted drivers, but it can also help virtually any organization meet regulatory requirements, build trust with customers, and obtain a greater level of assurance.

Revolutionizing the way personal data is shared.

Simple
Start quickly, scale easily

Accurate
Data you can trust

Secure
No exposure to personal data

Compliant

How it Works

1. Customize

Configure your MVR policy by selecting up to 390 motor vehicle violations that best characterize your company's safety standards.

2. Request

With a simple ID scan and minimal data entry, initiate your MVR verification request with less friction and frustration.

3. Capture Consent

Easily obtain an individual's consent to demonstrate regulatory compliance in states like Pennsylvania and Washington that require this.

4. Verify

Automatically verify MVRs with the most authoritative data pulled directly from the Department of Motor Vehicles.

5. Review or Subscribe

Select a one-time verification, or a re-verification subscription, and receive updated MVR results to verify ongoing compliance with company policies.

TECHNOLOGY & SCALE

TECHNOLOGY

Evident leverages **artificial intelligence** and **facial recognition technologies** to streamline onboarding, minimize attrition, and facilitate comprehensive verifications and background checks with the highest degree of accuracy.

Evident's unique distributed data model, protected with end-to-end cryptography, gives companies the option to access a summarized or reduced version of the verified information they need, which virtually eliminates their risk of handling sensitive personal data.

SCALE

With a **growing library of more than 12,500 data attributes**, Evident can verify anything from government-issued IDs, criminal history, and insurance to professional licenses, education, and more. Evident has **four primary integration methods**, making it flexible, scalable, and capable of adapting to an organization's new business needs as they grow or pivot.

"Evident gives us the ability to verify users' identity and run MVR checks as often as we need them to in order to meet insurance coverage requirements."

- Adam Klenk, Director of Product Development | **Mobiliti**

Enabling companies of all industries, sizes, and geographies to verify motor vehicle records quickly, securely, and confidently... **that's the power of Evident.**
