

Next Generation COI Verification

A comprehensive solution that determines your risk, not just your compliance

Coverage is Critical, but Verification is a Pain

Most organizations spend a lot of time and effort managing insurance COI compliance, but even the most successful companies have little idea exactly how compliant they actually are. They might know approximately how many of their partners have COIs on file, but they rarely understand if all requested coverage types are present, if coverage values meet their requirements, or the risk from exclusions.

Just because insurance is hundreds of years old doesn't mean the technology and processes to manage it need to be as well.

Risk Compliance Management, Reinvented

Evident is redefining risk compliance. We don't just collect COIs - we digitize them, collecting all the policy data and analyzing them against your requirements to provide deep visibility into your risk and exposure.

Evident's COI Verification solution provides:

- ✓ **100% automated, out-of-the-box platform for COI tracking and management**
- ✓ **Digitization of all COIs for all coverage types**
- ✓ **Automated risk decisioning against your requirements**
- ✓ **Authoritative verification and continuous monitoring to detect change or loss of coverage**
- ✓ **Easy access to coverage for insureds, no workflow or selling on your part**
- ✓ **Comprehensive, highly accurate view of partner and vendor network risk**

We automate the entire process - from collection, verification and analysis, to decisioning, storage, and monitoring of COIs and policies - to remove the burden of managing your partners' compliance.

THE EVIDENT SOLUTION

TECHNOLOGY

We're not just a COI library, a COI tracker, an insurance sales tool, or a communication platform for insureds – **we're all of this and more.** Evident is a comprehensive platform that's solving the hardest part of insurance verification by working with insureds who don't meet corporate requirements and converting them into happy and compliant participants.

Automated Workflows

Evident fully automates COI management, relying on our technology and expertise to offload all of the steps in tracking, updating, and handling time-intensive exceptions to provide a more comprehensive and accurate program that costs less money and requires less of your time.

Deep Visibility

We go beyond verifying COI's to exact coverage provided, exclusions, and status changes to measure your real risk, not just your compliance.

Maximum Conversion

Evident anticipates policy renewals or changes in coverage needs and offers fulfillment to ensure maximum conversion rates. We handle exceptions and errors with ease, and identify policy gaps and opportunities to deliver recommended solutions directly to partners.

Program Optimization

Evident identifies program-level opportunities to cut cost or reduce risk, offering tools to drive efficiency, reduce overlaps and excesses, and minimize expenses for you and your partners.

“Marsh is constantly looking for innovative solutions that reduce our customers’ risk. Evident helps some of our largest customers verify facts about their communities that no other provider can verify, and they do it without requiring our customers to collect volumes of sensitive documentation.”

- Jose Hefty, Managing Director | Marsh

Evident is redefining risk compliance by providing real-time analysis and decisioning based on live COI data from partner, vendor, and franchisee networks to ensure that their insurance policies are active, valid, and meet corporate requirements.
